Subject Index to Volume 36

answer set programming, 345
automated deduction, 311
automated theorem-proving, 241

Boolean algebra, 213

calculus of fractions, 259
category, 259
complexity, 213
computer proof verification, 259
computer proofs, 311
constraint programming, 177
counterexamples, 149
cryptographic protocols, 85, 125
cryptographic security protocols, 149

decision procedure, 213
deductive verification, 5
dictionary attacks, 85

electronic commerce, 5
exponent, 241

finite models, 177
formal methods, 85
formal modelling, 125
functor, 259

GM protocol, 39
group, 241

inductive definitions, 5
Isabelle, 5

Knuth–Bendix ordering, 289

localization, 259

mathematical induction, 311
multiparty contract signing, 39

Otter, 311

Presburger arithmetic, 213
probabilistic encryption, 85
program proof, 379
program transformation, 289
program verification, 213
proof assistant, 259
proof planning, 379
propositional satisfiability, 345

quantifier elimination, 213

recursion, 125
replication, 125

second-order, 311
security protocols, 5
single axiom, 241
SPARK, 379
static analysis, 379
superposition, 149
symmetry, 177

unification, 311

verification, 85
